

# Vitacare Pediatric Reflux Wedge

Item # 6282

Designed specifically for infants with Gastroesophageal Reflux (GERD), the Vitacare Pediatric Reflux Wedge offers comfort, support, elevation and an alternative to taking medication. The top layer of Visco "Memory Foam" along with the contoured positioning channel provides equal weight distribution and secure lateral positioning. Infant harness comfortably secures the baby in place with velcro straps and buckle system for easy access and added safety.

## Features & Benefits

- Comfortably and securely maintains baby in elevated position
- Full Visco "Memory Foam" surface provides maximum comfort, support and equal weight distribution
- Comfortably positions baby on side, stomach or back
- Contoured positioning channel for ideal lateral support and stability
- Lightweight (8 LBS.) and easy to use
- 5 way stretch, washable, anti-microbial, incontinent cover
